March of 2013, 35 educators in the Atlanta Public Schools were charged with racketeering and conspiracy—the same charges used to bring down the American mafia—for allegedly changing students' answers on standardized tests. All but one was black. The youngest of the accused, Shani Robinson, had taught for only 3 years and was a new mother when she was wrongfully convicted and faced up to 25 years in prison. She and her coauthor, journalist Anna Simonton, look back to show how black children in Atlanta were being deprived long before some teachers allegedly changed the answers on their students' tests. Stretching all the way back to *Brown v. Board of Education*, the landmark 1954 Supreme Court ruling that outlawed segregation in public schools, to examining the corporate-led education reform movement, the policing of black and brown citizens, and widening racial and economic disparities in Atlanta, Robinson and Simonton reveal how real

estate moguls and financiers were lining their pockets with the education dollars that should have been going to the classroom.

Making Big Schools Feel Small - Paul S. George 2000

Increasing numbers of middle school educators believe that the education of young adolescents can be enhanced when teachers and students

are members of classrooms and small team groups characterized by long-lasting relationships. This book describes how to offer students the benefits of smallness within increasingly larger schools by ensuring long-term teacher-student relationships. Three major ways of achieving such relationships are detailed: (1) multiage grouping; (2) looping; and (3) schools-within-a-school. Research on middle school organizational patterns is summarized. Also presented are the findings of a national survey on long-term teacher-student relationships that gathered the opinions of 105 educators, 586 parents, and 1,100 students from 33 schools. Guidelines for practitioners interested in implementing long-term teacher-student relationships to make big schools seem small conclude the book. (Contains 53 references.) (KB)

Testing - Arlo Kempf

2016-04-29

Based on a large-scale international study of teachers in Los Angeles, Chicago, Ontario, and New York, this book illustrates the ways increased use of high-stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn. Standardized testing makes understanding students' strengths and weaknesses more difficult, and class time spent on testing consumes scarce time and attention needed to support the success of all students—further disadvantaging ELLs, students with exceptionalities, low income, and racially minoritized students.
