**The Poetics of Aristotle** - Aristotle 2017-03-07

In it, Aristotle offers an account of what he calls

"poetry" (a term which in Greek literally means

"making" and in this context includes drama -

comedy, tragedy, and the satyr play - as well as

lyric poetry and epic poetry). They are similar in

the fact that they are all imitations but different

in the three ways that Aristotle describes: 1.

Differences in music rhythm, harmony, meter

and melody. 2. Difference of goodness in the

characters. 3. Difference in how the narrative is

presented: telling a story or acting it out. In

examining its "first principles," Aristotle finds

two: 1) imitation and 2) genres and other

concepts by which that of truth is

applied/revealed in the poesis. His analysis of

tragedy constitutes the core of the discussion.

Although Aristotle's Poetics is universally

acknowledged in the Western critical tradition,

"almost every detail about his seminal work has

aroused divergent opinions."

**An Encyclopedia of Swearing** - Geoffrey  
Hughes 2015-03-26

This is the only encyclopedia and social history of swearing and foul language in the English-speaking world. It covers the various social dynamics that generate swearing, foul language, and insults in the entire range of the English language. While the emphasis is on American and British English, the different major global varieties, such as Australian, Canadian, South African, and Caribbean English are also covered. A-Z entries cover the full range of swearing and foul language in English, including fascinating details on the history and origins of each term and the social context in which it found expression. Categories include blasphemy, obscenity, profanity, the categorization of women and races, and modal varieties, such as

the ritual insults of Renaissance "flyting" and modern "sounding" or "playing the dozens." Entries cover the historical dimension of the language, from Anglo-Saxon heroic oaths and the surprising power of medieval profanity, to the strict censorship of the Renaissance and the vibrant, modern language of the streets. Social factors, such as stereotyping, xenophobia, and the dynamics of ethnic slurs, as well as age and gender differences in swearing are also addressed, along with the major taboo words and the complex and changing nature of religious, sexual, and racial taboos.

**Tales from the Pit** - David G. Schwartz 2016  
Dealing in a casino presents challenges and rewards not seen in many workplaces. With hundreds of thousands of dollars at stake every minute, table games pits are high-stress workplaces. Managing a workforce of dealers and attending to the needs of players brings stresses of its own. In 2015, the University of Nevada, Las Vegas's Center for Gaming Research received a grant from the UNLV University Libraries Advisory Board that enabled it to undertake an oral history project intended to capture the stories of table games managers, including both those currently working in the field and those who have retired. Drawn from these interviews, Tales from the Pit provides an overview of how the interviewees felt about a variety of topics, ranging from their experiences breaking in as new dealers to their transitions to management and the changes the industry has seen over their careers. The current and former managers speak candidly about the owners, bosses, dealers, and players who made each day challenging. This book illuminates the past several decades of casino history through the words of those who lived and made it.

*Race Tech's Motorcycle Suspension Bible* - Paul Thede 2010-06-19

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

*From Higher Places* - Roger Curtis 2017-06-13

A young woman is facially disfigured in an apparently motiveless attack. As her relationships with those around her change, she is forced to confront her own shortcomings. Gradually it becomes apparent that she has been a pawn in the machinations of an exclusive and secretive club for the seriously rich that, unknown to her, has been a malign influence on her life and family since childhood. When her face is restored by a skilled surgeon the motive behind the apparently senseless attack is revealed. But does she stand a chance of bringing those responsible to justice, or will she only succeed in creating some very powerful and dangerous enemies?

*Homo Deus* - Yuval Noah Harari 2017-02-21  
Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER  
Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from bingeing at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.  
*Haynes Manual on Welding* - Jay Storer
