**Aloha America** - Adria L. Imada 2012-07-09  
Winner, 2013 Best First Book in Women's, Gender, and/or Sexuality History by the Berkshire Conference of Women Historians  
Winner, 2013 Lawrence W. Levine Award, Organization of American Historians  
Winner, 2013 Congress on Research in Dance  
Outstanding Publication Award  
Aloha America reveals the role of hula in legitimating U.S. imperial ambitions in Hawai'i. Hula performers began touring throughout the continental United States and Europe in the late nineteenth century. These "hula circuits" introduced hula, and Hawaiians, to U.S. audiences, establishing an "imagined intimacy," a powerful fantasy that enabled Americans to possess their colony

physically and symbolically. Meanwhile, in the early years of American imperialism in the Pacific, touring hula performers incorporated veiled critiques of U.S. expansionism into their productions. At vaudeville theaters, international expositions, commercial nightclubs, and military bases, Hawaiian women acted as ambassadors of aloha, enabling Americans to imagine Hawai'i as feminine and benign, and the relation between colonizer and colonized as mutually desired. By the 1930s, Hawaiian culture, particularly its music and hula, had enormous promotional value. In the 1940s, thousands of U.S. soldiers and military personnel in Hawai'i were entertained by hula performances, many of which were filmed by military photographers. Yet, as Adria L. Imada shows, Hawaiians also used hula as a means of cultural survival and countercolonial political praxis. In *Aloha America*, Imada focuses on the years between the 1890s and the 1960s, examining little-known performances and films before turning to the

present-day reappropriation of hula by the Hawaiian self-determination movement.

### **Interdisciplinary Nutritional Management and Care for Older Adults - Ólöf G. Geirsdóttir 2021**

This open access book aims to primarily support nurses as leaders and champions of multimodal, Interdisciplinary nutrition care for older adults. A structured approach to fundamentals of nutrition care across Interdisciplinary settings is combined with additional short chapters about special topics in geriatric nutrition. The book is designed to provide highly accessible information on evidence-based management and care for older adults, with a focus on practical guidance and advice across acute, rehabilitation, and primary and secondary malnutrition prevention settings. The cost of malnutrition in England alone has been estimated to be 119.6

billion per year, or more than 15% of the total public expenditure on health and social care. ^65 years). The importance and benefit of specialised nutrition care, delivered by experts in field, is well established for those with complex nutrition care needs. However, despite the substantial adverse impact of malnutrition on patient and healthcare outcomes, specialised management of this condition is often under-resourced, overlooked and under-prioritised by both older adults and their treating teams. As an alternative, timely, efficient, and effective supportive nutrition care opportunities may be appropriately implemented by nurses and non-specialist Interdisciplinary healthcare team members, working together with nutrition specialists and the older adults they care for. Practical, low-risk opportunities should be considered across nutrition screening, assessment, intervention, and monitoring domains for many patients with, or at risk of malnutrition. Whilst a variety of team members

may contribute to supportive nutrition care, the nursing profession provide a clear focal point. Nurses across diverse settings provide the backbone for Interdisciplinary teamwork and essential patient care. The nursing profession should consequently be considered best placed to administer Interdisciplinary, multimodal nutrition care, wherever specialist nutrition care referrals are unlikely to add value or are simply not available. As such, the book is a valuable resource for all healthcare providers dedicated to working with older patients to improve nutrition care.

**Burnout for Experts** - Sabine Bährer-Kohler 2012-11-11

Wherever people are working, there is some type of stress—and where there is stress, there

is the risk of burnout. It is widespread, the subject of numerous studies in the U.S. and abroad. It is also costly, both to individuals in the form of sick days, lost wages, and emotional exhaustion, and to the workplace in terms of the bottom line. But as we are now beginning to understand, burnout is also preventable. Burnout for Experts brings multifaceted analysis to a multilayered problem, offering comprehensive discussion of contributing factors, classic and less widely perceived markers of burnout, coping strategies, and treatment methods. International perspectives consider phase models of burnout and differentiate between burnout and related physical and mental health conditions. By focusing on specific job and life variables including workplace culture and gender aspects, contributors give professionals ample means for recognizing burnout as well as its warning signs. Chapters on prevention and intervention detail effective programs that can be implemented at

the individual and organizational levels. Included in the coverage: · History of burnout: a phenomenon. · Personal and external factors contributing to burnout. · Depression and burnout · Assessment tools and methods. · The role of communication in burnout prevention. · Active coping and other intervention strategies. Skillfully balancing scholarship and accessibility, Burnout for Experts is a go-to resource for health psychologists, social workers, psychiatrists, and organizational, industrial, and clinical psychologists.

Gender and Forests - Carol J. Pierce Colfer  
2016-04-14

This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to analyse global gender conditions as related to forests. Using a variety of methods and approaches, they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and under-studied themes. Focusing particularly on tropical forests, the book presents both local case studies and global comparative studies from Africa, Asia, and Latin America, as well as the US and Europe. The studies range from personal histories of elderly

American women's attitudes toward conservation, to a combined qualitative / quantitative international comparative study on REDD+, to a longitudinal examination of oil palm and gender roles over time in Kalimantan. Issues are examined across scales, from the household to the nation state and the global arena; and reach back to the past to inform present and future considerations. The collection will be of relevance to academics, researchers, policy makers and advocates with different levels of familiarity with gender issues in the field of forestry.

*Teacher Professional Development for Improving Quality of Teaching* - Bert Creemers 2012-11-05

This book makes a major contribution to knowledge and theory by drawing implications of teacher effectiveness research for the field of teacher training and professional development.

The first part of the book provides a critical review of research on teacher training and professional development and illustrates the limitations of the main approaches to teacher development such as the competence-based and the holistic approach. A dynamic perspective to policy and practice in teacher training and professional development is advocated. The second part of the book provides a critical review of research on teacher effectiveness. The main phases of this field of research are analysed. It is pointed out that teacher factors are presented as being in opposition to one another. An integrated approach in defining quality of teaching is adopted. The importance of taking into account findings of studies investigating differential teacher effectiveness is argued. Another significant limitation of this field of research is that the whole process of searching for teacher effectiveness factor was not able to have a significant impact upon teacher training and professional development.

For this reason it is advocated that teacher training and professional development should be focused on how to address grouping of specific teacher factors associated with student learning and on how to help teachers improve their teaching skills by moving from using skills associated with direct teaching only to more advanced skills concerned with new teaching approaches and differentiation of teaching. The book refers to studies conducted in different countries illustrating how the proposed approach can be used by policy and practice in teacher education. Specifically, the book provides evidence supporting the validity of the theoretical framework upon which this approach is based. Moreover, experimental and longitudinal studies supporting the use of this approach for improvement purposes are presented and suggestions for further research utilising and expanding the Dynamic Approach for teacher training and professional development are provided.

*A Subject Index of the Modern Works Added to the Library of the British Museum in the Years 1885-1890* - George Knottesford Fortescue 1891

War and Escalation in South Asia - John E. Peters 2006

The advent of two nuclear powers in South Asia,

discoveries of nuclear trafficking, and insurgencies and terrorism that threaten important U.S. interests and objectives directly have transformed the region from a strategic backwater into a primary theater of concern for the United States. The United States, to a great extent free of the restrictions of earlier sanction regimes and attentive to the region's central role in the global war on terrorism (GWOT), has engaged the states of South Asia aggressively with a wide variety of policy initiatives. Despite the diversity of policy instruments, few are very powerful; indeed, only the U.S. military seems to offer many options for Washington to intensify further its security cooperation and influence in the region. This monograph highlights key factors in the region that imperil U.S. interests, and suggests how and where the U.S. military might play an expanded, influential role. The report notes that the current U.S. military force posture, disposition, and lines of command may not be optimal, given South Asia's new status in

the U.S. strategic calculus, and suggests seven key steps the military might take to improve its ability to advance and defend U.S. interests, not only in South Asia, but beyond it, including the Middle East and Asia at large. Beyond the specifics, however, the broader message arising from this analysis is straightforward: the region's salience for U.S. policy interests has increased dramatically. It is therefore prudent to intensify Washington's involvement in the region and to devote the resources necessary to become more influential with the governments within the region. Given the area's potential for violence, it is also prudent to shape a part of the U.S. military to meet the potential crises emanating from South Asia, just as the United States once shaped its military presence in Western Europe for the contingencies of the Cold War.

### **Issues Around Aligning Theory, Research and Practice in Social Work Education -**

Allucia L. Shokane 2018-12-01

Issues Around Aligning Theory, Research and Practice in Social Work Education provides a reflection on social work education with a slant towards an Afrocentric approach, aiming to facilitate strong reflective thinking and to address local realities about social work education on the African continent as well as in broader global contexts. This volume focuses on issues around aligning theory, research and practice in social work education. A significant contribution is made here to the scholarly understanding of opportunities to sustain the academic discourse on social work education.

Social work as a profession and a social science discipline is dynamic, and it ought to meet the challenges of the realities of the societies in which it serves, given the history of the changing society of South Africa from apartheid to democracy. Over the years, social work education and training has undergone tremendous curricular changes with the enactment of the White Paper for Social Welfare and the national review, respectively, by the South African Council for Social Services Professions (SACSSP) and the Council on Higher Education (CHE) for the re-accreditation of all Bachelor of Social Work (BSW) programmes in South Africa fulfilling the prescripts of the Higher Education Act (No. 101 of 1997, as amended) and Social Service Professions Act (No. 110 of 1978). It is worth mentioning that the curricular changes will also continue with the current reviewing of Social Service Professions Act (No. 110 of 1978), as amended, which is underway in South Africa. This book is

really ground-breaking! The Afrocentric perspective on social work practice contributes to the current discourse on decolonisation of social work teaching and practice. From a methodological perspective, the book is premised on multi-, inter- and trans-disciplining in social sciences. It covers aspects of social work education and practice through research (narrative, qualitative, African methodology, secondary data analysis, etc.), engendering values and ethics, report writing, supervision in fieldwork as well as exchange programmes and international service-learning, addressing a number of concepts such as cultural competency, cultural awareness and sensitivity are addressed.

**Evidence-based Social Work** - Mel Gray  
2009-05-08

Evidence-based practice is now a core element of many governments' approaches to policy-

making and social intervention. It has become a powerful movement that promises to change the content and structure of social work and its allied professions. Its emergence has generated much debate and raised challenging questions, however, particularly at the interface of research, policy, and practice. This book provides a critical analysis of evidence-based practice in social work. It introduces readers to the fast changing research, policy, legislative, and practice context. It discusses what constitutes knowledge in social work, the values and beliefs that lie behind EBP and problems of implementation, formalisation and resource management. Reflecting on the challenges of transferring evidence-based practice to frontline social work practice, the authors argue that

social work practice is not easily measured and systematised into best practice guidelines that disseminate proven diagnostic and effective intervention knowledge. Using Actor Network Theory for the first time in the social work literature, Evidence-based Social Work illuminates how adopting the methodology and language of evidence-based practice fundamentally alters the conditions under which social work takes place. This book is vital reading for academics, practitioners, and students with an interest in contemporary social work practice and research.
