Handbook of Computational Statistics -

James E. Gentle 2012-07-06

The Handbook of Computational Statistics - Concepts and Methods (second edition) is a revision of the first edition published in 2004, and contains additional comments and updated information on the existing chapters, as well as three new chapters addressing recent work in the field of computational statistics. This new edition is divided into 4 parts in the same way as the first edition. It begins with "How Computational Statistics became the backbone of modern data science" (Ch.1): an overview of the field of Computational Statistics, how it emerged as a separate discipline, and how its own development mirrored that of hardware and software, including a discussion of current active research. The second part (Chs. 2 - 15) presents several topics in the supporting field of statistical computing. Emphasis is placed on the need for fast and accurate numerical algorithms, and some of the basic methodologies for transformation, database handling, high-dimensional data and graphics treatment are discussed. The third part (Chs. 16 - 33) focuses on statistical methodology. Special attention is given to smoothing, iterative procedures, simulation and visualization of multivariate data. Lastly, a set of selected applications (Chs. 34 - 38) like Bioinformatics, Medical Imaging, Finance, Econometrics and Network Intrusion Detection highlight the usefulness of computational statistics in real-world applications.

Handbook of Nonpathologic Variations in Human Blood Constituents - Richard W.

Richardson 1994-06-21

This book brings together information currently scattered throughout the medical and scientific literature about non-pathological changes in the concentration of blood constituents. The author discusses these variations, which may be statistical, methodological, physiological, age-related, alcohol-related, or due to smoking or drug use. These are important variations and must be taken into account by clinicians when interpreting laboratory results. The handbook offers a quantitative account of variation in the concentration of blood constituents with recommendations for international units of measurement, reference interval determination, and selection of reference subjects. This helpful guide includes more than 1,500 references covering the whole period of development of clinical chemistry, and provides an important historical perspective. Previously unpublished results from the author's laboratory are also included for healthy subjects of different sex and age, as well as the distribution of serum bilirubin obtained from over 3,000 hospital staff members.

Prisoners' Self-Help Litigation Manual - John Boston 2010-09-27

Prisoners' Self-Help Litigation Manual, in its much-anticipated fourth edition, is an indispensable guide for prisoners and prisoner advocates seeking to understand the rights guaranteed to prisoners by law and how to protect those rights. Clear, comprehensive, practical advice provides prisoners with everything they need to know on conditions of confinement, civil liberties in prison, procedural due process, the legal system, how to litigate, conducting effective legal research, and writing legal documents. Written by two legal and penitentiary experts with intimate knowledge of prisoner's rights and legal aid work, authors John Boston and Daniel E. Manville strategically focus on federal constitutional law, providing prisoners and those wishing to assist them with the most important information concerning legal rights. Over the past decade, prison law and conditions have changed significantly. This new

edition is updated to include the most relevant prisoners' rights topics and approaches to litigation. Updates include all aspects of prison life as well as material on legal research, legal writing, types of legal remedies, and how to effectively use those remedies. Certainly the most authoritative, well-organized and relevant prisoner's rights manual available - - the eagerly awaited fourth edition should be purchased by everyone interested in civil rights for the incarcerated.
