Radical Skepticism and Epistemic Intuition - Michael Bergmann 2021-07-01

Radical skepticism endorses the extreme claim that large swaths of our ordinary beliefs, such as those produced by perception or memory, are irrational. The best arguments for such skepticism are, in their essentials, as familiar as a popular science fiction movie and yet even seasoned epistemologists continue to find them strangely seductive. Moreover, although most contemporary philosophers dismiss radical skepticism, they cannot agree on how best to respond to the challenge it presents. In the tradition of the 18th century Scottish philosopher, Thomas Reid, *Radical Skepticism and Epistemic Intuition* joins this discussion by taking up four main tasks. First, it identifies the strongest arguments for radical skepticism, namely, underdetermination arguments, which emphasize the gap between our evidence and our ordinary beliefs based on that evidence. Second, it rejects all inferential or argument-based responses to radical skepticism, which aim to lay out good noncircular reasoning from the evidence on which we base our ordinary beliefs to the conclusion that those beliefs are probably true. Third, it develops a commonsense noninferential response to radical skepticism with two distinctive features: (a) it consciously and extensively relies on epistemic intuitions, which are seemings about epistemic goods, such as knowledge and rationality, and (b) it can be endorsed without difficulty by both internalists and externalists in epistemology. Fourth, and finally, it defends this commonsense epistemic-intuition-based response to radical skepticism against a variety of objections, including those connected with underdetermination worries, epistemic circularity, disagreement problems, experimental philosophy, and concerns about whether it engages skepticism in a sufficiently serious way.

The Porsche 911 Book - Jürgen Lewandowski 2018

The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose *The Mercedes-Benz 300 SL Book* has also been published by teNeues, showcases the most important models--all in his typically radiant and distinctive style.

Karate Chop - Dorthe Nors 2014-02-04

The first book in English by an acclaimed Danish writer: "beautiful, faceted, haunting stories . . . [from] a rising star" (Junot Díaz) *Karate Chop*, Dorthe Nors's acclaimed story collection, is the debut book in the collaboration between Graywolf Press and A Public Space. These fifteen compact stories are meticulously observed glimpses of everyday life that expose the ominous lurking under the ordinary. While his wife sleeps, a husband prowls the Internet, obsessed with female serial killers; a bureaucrat tries to reinvent himself, exposing goodness as artifice when he converts to Buddhism in search of power; a woman sits on the edge of the bed where her lover lies, attempting to locate a motive for his violence within her own self-doubt. Shifting between moments of violence (real and imagined) and mundane contemporary life, these stories encompass the complexity of human emotions, our capacity for cruelty as well as compassion. Not so much minimalist as stealthy,

Karate Chop delivers its blows with an understatement that shows a master at work.

Scolding - Erik Sigsgaard 2005-01-01

When children were asked, "What is the worst thing about being in a kindergarten?" the unanimous answer was: "To be scolded by the adults!" No one, including adults, enjoys being scolded by other people; it is both painful and humiliating. And yet scolding is regarded as something natural, and even inevitable, in the everyday life of young children. Why is this so? In his landmark study, originally published in Danish, Erik Sigsgaard took up the issue to wide acclaim and enthusiastic reviews. Translated here for the first time, Scolding: Why It Hurts More Than It Helps is as relevant to U.S. childcare policy and practice as it is to Danish. This book is a powerful reminder that when it comes to dealing with children, scolding hurts much more than it helps.

Sigsgaard brings scolding into sharp focus, reviewing existing research on the subject, including an important study of childcare across the United States, Denmark, China, and Japan, and presenting scolding in historical perspective. Featuring sometimes poignant, sometimes funny interviews with children and adults in preschool programs and schools, this book looks at how children are affected by frequent and severe scolding, in the short and in the long term, and which children are scolded the most. It presents alternatives to scolding, including suggestions for how children and adults can treat each other in everyday life to avoid scolding.

Curated Decay - Caitlin DeSilvey 2017-02-14

Transporting readers from derelict homesteads to imperiled harbors, postindustrial ruins to Cold War test sites, Curated Decay presents an unparalleled provocation to conventional thinking on the conservation of cultural heritage. Caitlin DeSilvey proposes rethinking the care of certain vulnerable sites in terms of ecology and entropy, and explains how we must adopt an ethical stance that allows us to collaborate with—rather than defend against—natural processes. Curated Decay chronicles DeSilvey's travels to places where experiments in curated ruination and creative collapse are under way, or under consideration. It uses case studies from the United States, Europe, and elsewhere to explore how objects and structures produce meaning not only in their preservation and persistence, but also in their decay and disintegration. Through accessible and engaging discussion of specific places and their stories, it traces how cultural memory is generated in encounters with ephemeral artifacts and architectures. An interdisciplinary reframing of the concept of the ruin that combines historical and philosophical depth with attentive storytelling, Curated Decay represents the first attempt to

apply new theories of materiality and ecology to the concerns of critical heritage studies.

Data Brokers - Federal Trade Commission 2015-03-11

In this report, the Federal Trade Commission discusses the results of an in-depth study of nine data brokers. These data brokers collect personal information about consumers from a wide range of sources and provide it for a variety of purposes, including verifying an individual's identity, marketing products, and detecting fraud. Because these companies generally never interact with consumers, consumers are often unaware of their existence, much less the variety of practices in which they engage. By reporting on the data collection and use practices of these nine data brokers, which represent a cross-section of the industry, this report attempts to shed light on the data broker industry and its practices. For decades, policymakers have expressed concerns about the lack of transparency of companies that buy and sell consumer data without direct consumer interaction. Indeed, the lack of transparency among companies providing consumer data for credit and other eligibility determinations led to the adoption of the Fair Credit Reporting Act ("FCRA"), a statute the Commission has enforced since its enactment in 1970. The FCRA covers the provision of consumer data by consumer reporting agencies where it is used or expected to be used for decisions about credit, employment, insurance, housing, and similar eligibility determinations; it generally does not cover the sale of consumer data for marketing and other purposes. While the Commission has vigorously enforced the FCRA, 1 since the late 1990s it has also been active in examining the practices of data brokers that fall outside the FCRA.

How Water Influences Our Lives - Per Jahren 2016-11-22

This beautifully illustrated book explains how water influences our culture; the many phases of water from ice to gas, its simple but still so unpredictable nature, and water resources on Earth; how water is distributed in ice, oceans, rivers, lakes and more; how it creates transport possibilities; how it produces and absorbs energy; how it is constantly changing the surface of the Earth; how there is enough water on Earth, yet sometimes there is too much or too little; the role of water in recreation; and how water supplies us with food in a myriad of ways. Few things are like water - a subtle and thought-provoking element, so simple and yet complicated, so conspicuous yet unpredictable, so soft and peaceful yet powerful, and so universal yet unique. Water is by far the world's largest commodity. Though it belongs to all of us, it is still not shared by all. We very seldom take time to reflect on the many ways that water affects our lives. Though it would be too ambitious to believe that it claims all the meanings and roles of water, this book, by showcasing water's versatility and by sharing the experiences and insights gained by the two authors during their many travels across the globe, contributes to a greater awareness of the most important substance in our society - water. The book offers an insightful and intriguing read for anyone interested in science and culture related to water, from laymen to students and decision-makers.

Leaders Eat Last - Simon Sinek 2014-01-07

The New York Times bestseller by the acclaimed, bestselling author of *Start With Why* and *Together is Better*. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millenials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice

their own comfort—even their own survival—for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

Terms of Service - Jacob Silverman 2015-03-17

Social networking has grown into a staple of modern society, but its continued evolution is becoming increasingly detrimental to our lives. Shifts in communication and privacy are affecting us more than we realize or understand. *Terms of Service* crystalizes this current moment in technology and contemplates its implications: the identity-validating pleasures and perils of online visibility; our newly adopted view of daily life through the lens of what is share-worthy; and the surveillance state operated by social media platforms—Facebook, Google, Twitter, and others—to mine our personal data for advertising revenue, an invasion of our lives that is as pervasive as government spying. Jacob Silverman calls for social media users to take back ownership of their digital selves from the Silicon Valley corporations who claim to know what's best for them. Integrating politics, sociology, national security, pop culture, and technology, he reveals the surprising conformity at the heart of Internet culture—explaining how social media companies engineer their products to encourage shallow engagement and discourage dissent. Reflecting on the collapsed barriers between our private and public lives, Silverman brings into focus the inner conflict we feel when deciding what to share and what to "like," and explains how we can take the steps we need to free ourselves from its grip.

Sociology of Giving - Helmuth Berking 1999-03-30

This book decodes the ambivalence of gift-giving. It examines its socio-ethical and integrative potential. Following a short recollection of contemporary gift-giving, its motives, occasions and its rules, the reader is invited to travel back in time and space examining 'sacrifice', 'food-sharing', and 'gift giving' as those basic institutions upon which symbolic orders of 'traditional' society rely. The historical invention of hospitality is considered and paves the way to an analysis of the anthropology of giving. Berking goes on to explore the transition from traditional society to the market, self interest form. He questions the view that our societies are dominated by individualism and explores the contemporary interplay between self interest and the common good.

River Cottage Much More Veg - Hugh Fearnley-Whittingstall 2017-09-21

Hugh's *River Cottage Veg Every Day!* became the UK's best-selling vegetable cookbook, persuading us through sheer temptation to make vegetables the mainstay of our daily cooking. In this much-anticipated follow-up, Hugh delivers more irresistible recipes, and this time, takes things one step further. Fuelled by his passionate belief that plant foods should be the dominant force in our kitchens, Hugh has put cheese, butter, cream, eggs, and refined flour and sugar firmly to one side. Instead, he uses veg, fruit, wholegrains, nuts, seeds, spices and cold-pressed oils to explore the length and breadth of what can be achieved

with natural, unprocessed plant foods. *River Cottage Much More Veg!* makes it clear that unadulterated ingredients are the very best building blocks for delicious and healthy meals. In typical Hugh style, the recipes are easy, utterly foolproof and delicious. All but a handful are gluten-free, and at least half the dishes require 20 minutes (or less) hands-on work time. With recipes such as Roast squash and chickpeas with spicy apricot sauce, Blackened cauliflower with pecans and tahini, Spiced beetroot, radicchio and orange traybake, Celeriac and seaweed miso broth, Seared summer cabbage with rosemary, chilli and capers, and Baked celery agrodolce, *River Cottage Much More Veg!* demonstrates how easy it is to make versatile, plentiful and delicious vegetables the bedrock of your diet.
