A Quantum City - Ludger Hovestadt 2015-06-16
We know the specific strengths of various cities, are aware of their ranking, are able to discuss their density and growth. But what do all cities have in common, what do we know about the “lowest common denominator”? The “city as a species”, the “primal genetic material of the city”: this is the subject of *A Quantum City*. This colossal work is a love letter to the city and intellectual culture. We follow the fictional narrative figure, Orlando, beginning in 320 BC, on his odyssey through the Western world up to the present time. The book is divided into four interrelated chapters and can be read page by page in a discursive manner, however randomly browsing through the book also offers new and multi-faceted interpretations. Great intellectual achievements are compared with obscure and

mundane events. *A Quantum City* offers an inspiring view of the city that is in us and around us.

Visual/Spatial Portals to Thinking, Feeling and Movement - Serena Wieder 2012

Clinical psychologist Serena Wieder Ph.D. redefines the building blocks of development and the challenges that derail a child's functioning and learning. For Wieder, vision and space -- what is seen by the eyes, transformed by the mind and experienced as movement, plays a crucial but heretofore underestimated crucial role in the development of a child's thoughts and feelings. Co-author Harry Wachs, O.D., a pioneer of developmental vision therapy, offers therapy focused on visual/spatial aspects of development supporting cognition. Based on decades of experience, Wieder and Wachs guide therapists and parents in interventions for use at home, school and therapy offices involving affect based Floortime approaches and
