**US Consular Representation in Britain Since 1790** - Nicholas M Keegan 2018-03-08

In its early years the United States Consular Service was a relatively amateurish organization, often staffed by unsuitable characters whose appointments had been obtained as political favours from victorious presidential candidates—a practice known as the Spoils System. Most personnel changed every four years when new administrations came in. This compared unfavourably with the consular services of the European nations, but gradually by the turn of the twentieth century things had improved considerably—appointment procedures were tightened up, inspections of consuls and how they managed their consulates were introduced, and the separate Consular Service and Diplomatic Service were merged to form the Foreign Service. The first appointments to Britain were made in 1790, with James Maury becoming the first operational consul in the country, at Liverpool. At one point, there was a network of up to ninety US consular offices throughout the UK, stretching from the Orkney Islands to the Channel Islands. Nowadays, there is only the consular section in the embassy and the consulates general in Edinburgh and Belfast.

Good School Maintenance - 1996

This manual, published by the Illinois Association of School Boards, was designed to be used as a teaching tool and reference source for overseeing effective school maintenance. Section 1 describes the basics of good school maintenance, including managing the program, using computers, controlling energy costs, ensuring safe practices, designing buildings for efficient maintenance, and being informed about environmental issues. Section 2 details guidelines for operating cleaning and general building services, such as custodial operations, area cleaning programs, and equipment and supplies. A custodian's glossary is included. The third section provides guidelines for building maintenance, specifically, caring for the exterior and roof. Procedures for maintaining school grounds are detailed in the fourth section. The fifth section describes the maintenance of mechanical equipment, including heating and air conditioning systems, sanitary systems and fixtures, sewage treatment plants, and electrical systems. A management tools appendix contains a list of environmental resources; sections on cleaning and general building services, grounds maintenance, and mechanical equipment; and annual inspection checklists.
