**Allocating Federal Funds for State Programs for English Language Learners -**

National Research Council 2011-06-20

As the United States continues to be a nation of immigrants and their children, the nation's school systems face increased enrollments of students whose primary language is not English. With the 2001 reauthorization of the Elementary and Secondary Education Act (ESEA) in the No Child Left Behind Act (NCLB), the allocation of federal funds for programs to assist these students to be proficient in English became formula-based: 80 percent on the basis of the population of children with limited English proficiency<sup>1</sup> and 20 percent on the basis of the population of recently immigrated children and youth. Title III of NCLB directs the U.S.

Department of Education to allocate funds on the basis of the more accurate of two allowable data sources: the number of students reported to the federal government by each state education agency or data from the American Community Survey (ACS). The department determined that the ACS estimates are more accurate, and since

2005, those data have been basis for the federal distribution of Title III funds. Subsequently, analyses of the two data sources have raised concerns about that decision, especially because the two allowable data sources would allocate quite different amounts to the states. In addition, while shortcomings were noted in the data provided by the states, the ACS estimates were shown to fluctuate between years, causing concern among the states about the unpredictability and unevenness of program funding. In this context, the U.S. Department of Education commissioned the National Research Council to address the accuracy of the estimates from the two data sources and the factors that influence the estimates. The resulting book also considers means of increasing the accuracy of the data sources or alternative data sources that could be used for allocation purposes.

*The Embodied Mind* - Thomas R. Verny

2021-10-05

As groundbreaking synthesis that promises to shift our understanding of the mind-brain connection and its relationship with our bodies. We understand the workings of the human body as a series of interdependent physiological relationships: muscle interacts with bone as the heart responds to hormones secreted by the brain, all the way down to the inner workings of every cell. To make an organism function, no one component can work alone. In light of this, why is it that the accepted understanding that the physical phenomenon of the mind is attributed only to the brain? In *The Embodied Mind*, internationally renowned psychiatrist Dr.

Thomas R. Verny sets out to redefine our concept of the mind and consciousness. He brilliantly compiles new research that points to the mind's ties to every part of the body. *The Embodied Mind* collects disparate findings in physiology, genetics, and quantum physics in order to illustrate the mounting evidence that somatic cells, not just neural cells, store memory, inform genetic coding, and adapt to environmental changes—all behaviors that contribute to the mind and consciousness. Cellular memory, Verny shows, is not just an abstraction, but a well-documented scientific fact that will shift our understanding of memory. Verny describes single-celled organisms with no brains demonstrating memory, and points to the remarkable case of a French man who, despite having a brain just a fraction of the typical size, leads a normal life with a family and a job. *The Embodied Mind* shows how intelligence and consciousness—traits traditionally attributed to the brain alone—also permeate our entire being.

Bodily cells and tissues use the same molecular mechanisms for memory as our brain, making our mind more fluid and adaptable than we could have ever imaged.

Interpreter Sam Carries On - Donald A. Herron  
2016-10-15

Interpreter Sam Carries On (SEG Geophysical Monograph Series No. 20) is a collection of the seventh through the fourteenth years of "Interpreter Sam" columns from The Leading Edge. It "carries on" with the stories of the fictitious Interpreter Sam, the sometimes hero, sometimes victim, and most often innocent bystander in circumstances typical of a seismic interpreter's career in the oil and gas industry. As in the first Interpreter Sam volume, SEG Geophysical Monograph Series No. 15, each chapter of the book begins with a caricature of Sam (and others) created by the artist David Carman. In the epilogue, Sam presents three verses, based on the works of three well-known poets but adapted to the modern interpretation

environment. This book extends the storytelling tradition of its predecessor; paraphrasing the noted paleontologist and historian of nature Stephen Jay Gould, it retells actual events as stories with the intent to interest and to instruct, and as such is appropriate for readers of all persuasions.

*The Xing* - Gary James 2018-03-30

The Existence of God can be a challenging topic when brought up between theists and non-theists. Even so, there is much productive discussion to be had on the subject when people of differing perspectives meet. The Xing (The Crossing) paints a portrait of six different encounters between persons of different professional backgrounds. In these chance meetings, the professionals will present their varying points of view. It seeks to highlight what most will think about, but few are willing to talk about: the question of God's existence. This exploration occurs through a variety of scenarios. A professor, through unforeseen circumstances, meets a mechanic. A lawyer speaks to his client, who is a truck driver. A neurosurgeon talks with his IT, and so on. Throughout their exchanges, a wide range of topics will be brought up. The inspiration for this novel comes from the Book of Job, in which Job debates with his friends over God's involvement in times of suffering, or lack thereof. This novel

depicts a series of civil and friendly discussions between persons who do not agree, which is really intended to inspire readers.

*Golden Ghetto: How the Americans and French Fell In and Out of Love During the Cold War* - Steve Bassett 2018-04-18

Considering the suspicions, jealousies, bigotry and greed inherent when a foreign power occupies another Golden Ghetto: How the Americans and French Fell In and Out of Love during the Cold War tells an improbable story. If ever a US military base deserved the sobriquet Golden Ghetto it was the Chateauroux Air Station, for 16 years at the height of the Cold War it was one of the most desirable postings in the world. Historians and casual readers will be enthralled by this bird's eye view of how early Communist driven distrust never stood a chance against handshakes and smiles.

**History with Elvis** - Bradford E. Loker 2011-12  
From the jittery beginnings, the controversial performances, the television appearances, the

movie making, the recording sessions, the cars, the homes, the pools, the girls, the management, the family, the fame, and all the way to his first day in the Army when all that came to a screeching halt for two years, Elvis Presley's journey in revolutionizing popular music between 1953 to 1958 is covered in this book called History with Elvis, Volume I, The Pre-Army Years. The book begins in January 1953 as the Presley family is evicted from a Memphis housing project and follows Elvis' journey in his rise to iconic status as one of the most famous, controversial, and popular entertainers in the world by the time he entered the military in March 1958 after being drafted. This period is extremely important for Elvis because not only did he become the family breadwinner, #1 RCA recording star, teen idol, movie star, but his family life would never be the same after that first day in the service as he would instantly lose his freedom and then his beloved mother 5 months later. Also intertwined with Elvis'

journey through this period are the events of world history. How did Elvis get so big, so fast, and what in the world was going on for this entertainer to be swept away into service for two years just as his career was taking off? This book attempts to let the actual facts and events as they happened help answer some of these questions and more as the reader re-visits some of the most incredible historical events of the 1950's including the Army-McCarthy hearings, the H-bomb, school desegregation, birth of Rock 'n' Roll, the space race, Dr. Salk's polio vaccine, death of James Dean, all the way down to the hula hoop craze and the poodle skirts. History cannot be complete without Elvis, and the Elvis story cannot be complete without history. This is an in-depth look at both. A "must have" book for any Elvis fan! BRADFORD E. "BUSTER" LOKER was born in Cut Off, Louisiana, on April 21, 1964. He currently lives in Thibodaux, Louisiana, with his wife Bonnie, and beautiful children Madison, Matthew, and Miles. He has been an

appraiser of real estate for the past 27 years. This is his second book. His first book is called History with the Beatles.

*Rethinking Patient Safety* - Suzette Woodward  
2017-03-27

The vast majority of healthcare is provided safely and effectively. However, just like any high-risk industry, things can and do go wrong. There is a world of advice about how to keep people safe but this delivers little in terms of changed practice. Written by a leading expert in the field with over two decades of experience, *Rethinking Patient Safety* provides readers with a critical reflection upon what it might take to narrow the implementation gap between the evidence base about patient safety and actual practice. This book provides important examples for the many professionals who work in patient safety but are struggling to narrow the gap and make a difference in their current situation. It provides insights on practical actions that can be immediately implemented to improve the safety of patient care in healthcare and provides readers with a different way of thinking in terms of changing behavior and practices as well as

processes and systems. Suzette Woodward shares lessons from the science of implementation, campaigning and social movement methods and offers the reader the story of a discovery. Her team has explored an approach which could profoundly affect the safety culture in healthcare; a methodology to help people talk to each other and their patients and to listen through facilitated safety conversations. This is their story.

*The Oxford Handbook of Accurate Personality Judgment* - Tera D. Letzring 2021-02-02

Each day, we make judgments about the personality characteristics of those around us, and we routinely rely on them to guide our behavior in interpersonal interactions and relationships. This handbook provides a review of theory and research on the accuracy of personality judgments. After a historical review, the first section presents the major theoretical models that guide research in this area and describes methodological approaches to

evaluating accuracy. The second section reviews the research findings relevant to four moderators of accuracy, and the third section focuses on judgments people make of themselves. The fourth section examines various types of information used in making personality judgments, while the fifth section provides examples of some of the domains to which accuracy research can be applied, including romantic relationships and clinical practice. Learning about the process of accurate judgments can be used to help people understand when and how they are more likely to make accurate judgments, and this handbook offers a thorough, evidence-based, and up-to-date review of this research field.

**Laying Down Arms to Heal the Creation-Evolution Divide** - Gary N. Fugle 2015-01-01

Battles over creation or evolution have been perpetuated for years by vocal Christians and scientists alike. But conflict has never been the only choice. Laying Down Arms to Heal the

Creation-Evolution Divide presents a comprehensive, uplifting alternative that brings together an orthodox, biblical view of a sovereign Creator-God and the meaningful discoveries of modern evolutionary biology. Gary Fugle offers unique insights into this debate from his dual perspective as both an award-winning biology professor and a committed leader in conservative evangelical churches. In focusing on the stumbling blocks that surround creation and evolution debates, Fugle sensitively addresses the concerns of skeptical Christians and demonstrates how believers may celebrate evolution as a remarkable aspect of God's glory. He describes how the mainstream scientific community, as well as numerous Christians, may alter current approaches to eliminate conflicts. He explains conservative readings of early Genesis that respect both the inerrant words of Scripture and the evolutionary revelations in God's natural creation. This book is for individuals who sense that biblical Christian

faith and evolution are compatible without compromising core convictions. If given good reasons to do so, are we willing to lay down our arms to affirm an encompassing vision for the future?

*Who was Who on TV - Norman Chance*  
2011-01-07

The information herein was accumulated of fifty some odd years. The collection process started

when TV first came out and continued until today. The books are in alphabetical order and cover shows from the 1940s to 2010. The author has added a brief explanation of each show and then listed all the characters, who played the roles and for the most part, the year or years the actor or actress played that role. Also included are most of the people who created the shows, the producers, directors, and the writers of the shows. These books are a great source of trivia information and for most of the older folk will bring back some very fond memories. I know a lot of times we think back and say, "Who was the guy that played such and such a role?" Enjoy!

**Asking and Answering** - Moritz Cordes  
2021-12-10

Questions are everywhere and the ubiquitous activities of asking and answering, as most human activities, are susceptible to failure - at least from time to time. This volume offers several current approaches to the systematic study of questions and the surrounding activities and works toward supporting and improving these activities. The contributors formulate general problems for a formal treatment of questions, investigate specific kinds of questions, compare different frameworks with regard to how they regulate the activities of

asking and answering of questions, and situate these activities in a wider framework of cognitive/epistemic discourse. From the perspectives of logic, linguistics, epistemology, and philosophy of language emerges a report on the state of the art of the theory of questions.

*Nomination of Daniel M. Tangherlini* - United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs 2014

**Crossing Zero** - Elizabeth Gould 2011-02-22  
The war in Afghanistan has become the most complex foreign policy problem the United

States has ever faced, spreading into Pakistan and involving the conflicting interests of Russia, India, China and Iran. Written as a companion to Elizabeth Gould and Paul Fitzgerald's widely acclaimed book *Invisible History: Afghanistan's Untold Story*, *Crossing Zero* focuses on the nuances of the Obama administration's evolving military and political strategy, the people implementing it, and the long-term consequences for the United States and the region. "Fitzgerald and Gould have consistently raised the difficult questions and inconvenient truths about western engagement in Afghanistan. While many analysts and observers have attempted to wish a reality on a grim and tragic situation in Afghanistan, Fitzgerald and Gould have systematically dug through the archives and historical record with integrity and foresight to reveal a series of misguided strategies and approaches that have contributed to what has become a tragic quagmire in Afghanistan. I suspect that many of their

assessments while presently viewed as controversial and contentious, will eventually be considered conventional wisdom."—Thomas Johnson "Americans are now beginning to grasp the scope of the mess their leaders made while pursuing misguided military adventures into regions of Central Asia we once called 'remote.' How this happened—and what the US can do to extricate itself from its entanglements in Pakistan and Afghanistan—is the story of *Crossing Zero*. Based on decades of study and research, this book draws lines and connects dots in ways few others do. It is clear, sober and methodical—an ideal handbook for anyone seeking to understand how the US became the latest imperial power to blunder into this turbulent and fascinating region."—Stephen Kinzer, author of *All the Shah's Men* and *Reset: Iran, Turkey and America's Future* "I loved it. An extraordinary contribution to understanding war and geo-politics in Afghanistan that will shock most Americans by its revelations of official

American government complicity in using, shielding, sponsoring and supporting terrorism. A devastating indictment on the behind-the-scenes shenanigans by some of America's most respected statesmen."—Daniel Estulin "Gould and Fitzgerald have identified the triumphalist strain that has marked American foreign policy over the past 100 years and documented President Obama's failure to introduce change to American national security policy. The war in Afghanistan is consistent with previous failures in U.S. policymaking over the past 50 years as well as with the misuse of military force. This book should be required reading at the National Security Council and the Pentagon."—Melvin A. Goodman; CIA Senior Soviet Analyst, 1966-1990; Professor of International Security at the National War College, 1986-2004; Senior Fellow, Center for International Policy, Washington, DC. Paul Fitzgerald and Elizabeth Gould, a husband and wife team, began working together in 1979 co-producing a documentary for Paul's television

show, Watchworks. Called, *The Arms Race and the Economy, A Delicate Balance*, they found themselves in the midst of a swirling controversy that was to boil over a few months later with the Soviet invasion of Afghanistan. Their acquisition of the first visas to enter Afghanistan granted to an American TV crew in the spring of 1981, brought them into the middle of the most heated Cold War controversy since Vietnam. But the pictures and the people inside Soviet occupied Afghanistan told a very different story from the one being broadcast on the evening news.

### **Southern African Development Community**

**Land Issues** - Ben Chigara 2013-03-01

This book constitutes volume one of a two volume examination of development community land issues in Southern Africa. In this volume, Ben Chigara undertakes a holistic interdisciplinary evaluation of the legitimacy of colonial and emergent post-colonial rule property rights in affected States of the Southern African Development Community

(SADC). It particularly focuses on intensifying litigation in national courts, the SADC Tribunal, and more recently the Washington based International Centre for the Settlement of Investment Disputes (ICSID) regarding counter claims to title to property. The book examines cultural, economic and political drivers at the core of SADC land issues, focusing on their significance and potential to contribute to the discovery of a new, sustainable land relations policy that guarantees social justice in the distribution of all the advantages and disadvantages relating to the allocation and use of land. Chigara shows that persistent systematic administrative failures by pre-colonial, colonial and post-colonial authorities have made for a very complex challenge that requires Solomonic tools that neither the Courts alone, nor human rights centric morality alone could resolutely attend. The book recommends a sophisticated systematic new approach to SADC land issues, which is developed in volume two,

Re-conceiving Property Rights in the New Millennium. This book will be of great interest to students and researchers of Property and Conveyancing Law, Human Rights Law and Land Law.

**Facing the Multicore-Challenge** - Rainer Keller 2010-10-06

This state-of-the-art survey features topics related to the impact of multicore and coprocessor technologies in science and for large-scale applications in an interdisciplinary environment. The papers cover all issues of current research in mathematical modeling, design of parallel algorithms, aspects of microprocessor architecture, parallel programming languages, compilers, hardware-aware computing, heterogeneous platforms, emerging architectures, tools, performance tuning, and requirements for large-scale applications. The contributions presented in this volume offer a survey on the state of the art, the concepts and perspectives for future

developments. They are an outcome of an inspiring conference conceived and organized by the editors within the junior scientist program of Heidelberg Academy for Sciences and Humanities titled "Facing the Multicore-Challenge", held at Heidelberg, Germany, in March 2010. The 12 revised full papers presented together with the extended abstracts of 3 invited lectures focus on combination of new aspects of multicore microprocessor technologies, parallel applications, numerical simulation, software development, and tools; thus they clearly show the potential of emerging technologies in the area of multicore and manycore processors that are paving the way towards personal supercomputing.

Barbarians of Oil - Sandy Franks 2011-05-12  
An engaging look at the global oil industry and how to navigate the price volatility and new policies associated with it Oil is a constantly changing industry, and with the recent BP oil spill in the Gulf of Mexico, more changes are

expected. From extra equipment, higher-cost insurance, and expensive technology to mandatory third-party inspections, costly delays, and shifting investments, analysts say the price tag of regulation will be stiff and not confined to the Gulf. The oil industry affects everyone, and the machinations of a few industry heads, the "Barbarians of Oil," can drastically change the lives of investors and consumers. In Barbarians of Oil author Sandy Franks offers the tips needed to avoid future market dips and dives as well as safeguard your investments and profit in the future. Details the petro-land grab in Africa, the Bush-Halliburton Era, the Gulf Wars, and the political dangers to the United States in Iran, Iraq, and other oil-rich nations Looks at the BP oil spill in the Gulf of Mexico and the impending long-term effects on investments and policy Explores the evolution of the modern oil industry including major corporations such as ExxonMobile, ConcoPhillips, Chevron, and BP Barbarians of Oil is a timely must read for hard-

working Americans concerned with their prosperity, as well as for those fascinated with the inner workings of the oil industry.

*Television Finales* - Douglas L. Howard  
2018-11-13

Today more than ever, series finales have become cultural touchstones that feed watercooler fodder and Twitter storms among a committed community of viewers. While the final episodes of *The Fugitive* and *M\*A\*S\*H* continue to rank among the highest rated broadcasts, more recent shows draw legions of binge-watching fans. Given the importance of finales to viewers and critics alike, Howard and Bianculli along with the other contributors explore these endings and what they mean to the audience, both in terms of their sense of narrative and as episodes that epitomize an entire show. Bringing together a veritable "who's who" of television scholars, journalists, and media experts, including Robert Thompson, Martha Nochimson, Gary Edgerton, David Hinckley, Kim Akass, and

Joanne Morreale, the book offers commentary on some of the most compelling and often controversial final episodes in television history. Each chapter is devoted to a separate finale, providing readers with a comprehensive survey of these watershed moments. Gathering a unique international lineup of journalists and media scholars, the book also offers readers an intriguing variety of critical voices and perspectives.

*Encyclopedia of Television Shows, 1925 through 2010, 2d ed.* - Vincent Terrace 2014-01-10

This fully updated and expanded edition covers over 10,200 programs, making it the most comprehensive documentation of television programs ever published. In addition to covering the standard network and cable entertainment genres, the book also covers programs generally not covered elsewhere in print (or even online), including Internet series, aired and unaired pilot films, erotic series, gay and lesbian series, risqué cartoons and experimental programs from 1925 through 1945.

*Crackstone Chronicles* - Bob Henneberger  
2010-09

To a basic civilization, advanced science can seem like magic. What happens when magic seems like advanced science? It depends on who is the observer and who is the observed. John

Crackstone and his Science Officer, Tem, accidentally become trapped on a cloaked planet on their way to a priority first contact mission. This planet and its unusual inhabitants change Crackstone's original mission, as well as the current time line of the universe. The Ambassador comes face to face with the mysterious "Time Keepers" race; Crackstone's civilization is a class three, the Time Keepers are at least a class six. The final installment of the Crackstone Chronicle trilogy answers the question of how an Ambassador from a system in the Andromeda Galaxy relates to two humans, an omniscient, immortal race called the "Time Keepers" and why scores of alien civilizations become interested in twentieth century Earth. The three novels of the Crackstone Chronicles, *Extinction*, *Connections* and *Extraordinary Solution* carry the reader through time and space, exploring the question: why would extraterrestrials visit Earth, let alone conceal themselves here?

Routledge Handbook of Deradicalisation and Disengagement - Stig Jarle Hansen 2020-03-24  
The Routledge Handbook of Deradicalisation and Disengagement offers an overview of the historical settings, theoretical debates, national approaches and practical strategies to deradicalisation and disengagement. Radicalisation and violent extremism are major global challenges, and as new and violent extremist groups and environments emerge, there is an increasing need for knowledge about how individuals physically exit these movements and how to change their mindset. Historically, much of the focus on these topics has been highly securitised and militarised; by contrast, this volume explores the need for more

community-based and 'soft' approaches. The handbook includes discussions from both right-wing/left-wing political and religiously inspired deradicalisation processes. The handbook is organised into three parts: 1 definitions, backgrounds and theories; 2 actors; 3 regional case studies. This handbook will be of much interest to students, researchers, scholars and professionals of deradicalisation, counterterrorism, political violence, political extremism, security studies and international relations in general.
