Managing Martians - Donna Shirley 2010-06-09

Donna Shirley's 35-year career as an aerospace engineer reached a jubilant pinnacle in July 1997 when Sojourner--the solar-powered, self-guided, microwave-oven-sized rover--was seen exploring the Martian landscape in Pathfinder's spectacular images from the surface of the red planet. The event marked a milestone in space, but for Donna Shirley, the leader of the mostly male team that designed and built Sojourner--and the first woman ever to manage a NASA program--it marked a triumph of another kind. *Managing Martians* is Shirley's captivating memoir of a life and career spent reaching for the stars. From her seemingly outlandish aspiration at age ten to build aircraft, to abandoning high school Home Ec in favor of mechanical drawing, and, at sixteen, becoming a licensed pilot, Shirley defied expectations from the beginning. In a vivid narrative, rich with anecdotes and thrilling turning points, Shirley recounts the intense battles she waged to defend her vision and the ingenuity and resourcefulness of her committed team. Her moment-by-cliffhanging-moment account of Pathfinder's landing and Sojourner's first tentative foray across the sands of Mars brilliantly captures the fulfillment of a lifelong dream as it heralds a brave new era of space exploration.

Estimating Market Value and Establishing Market Rent at Small Airports - Aviation Management Consulting Group, Inc 2020

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

Joyful Mending - Noriko Misumi 2020-03-17

Joyful Mending shows you how to fix old items of clothing, linens and household objects by turning tears and flaws into beautiful features. Simply by applying a few easy sewing, darning, felting, or crocheting techniques, as well as some sashiko and other favorite embroidery stitches, you can repair your favorite pieces in a transformative way. These techniques don't just save you money, but make your life more joyful, fulfilling and sustainable in an age of disposable "fast fashion." Author Noriko Misumi teaches you her philosophy of mending and reusing items based on the age-old Japanese concepts of mindfulness and Wabi Sabi (an appreciation of old and imperfect things). In her book, she shows you how to: Repair any kind of fabric that is torn, ripped or stained—whether knitted or woven Work with damaged flat or curved surfaces to make them aesthetically pleasing again Create repairs that blend in, as well as bold or whimsical visible repairs Darn your handmade or expensive gloves, sweaters and socks to make them look great again The joy to be found in working with your hands and the personal artistry you discover within yourself lie at the heart of this book. While nothing lasts forever, there's pleasure, as well as purpose, in appreciating age and imperfection. Joyful Mending allows you to surround yourself with the things that truly give you joy, whether they were given to you by a loved one, picked up in your travels or simply have a special place in your heart.

Lifelong Learning - Jim Smith 1999

This book provides the first comprehensive picture of lifelong learning and the radical changes needed if it is to become the cultural norm. Clearly written and readily accessible, the book identifies the shifts in attitude and behaviour which are needed to establish a lifelong learning culture. Looking ahead over the next quarter of a century, Jim Smith and Andrea Spurling show how government and learning providers must fundamentally reassess their use of time, space and finance. But, more than that, they also offer a practical, comprehensive and robust strategy for lifelong learning. Through trenchant analysis based on research commissioned by The Lifelong Learning Foundation, this book shows ways of confronting difficult choices and realizing the aim of comprehensive lifelong learning.

High and Mighty - Keith Bradsher 2004-01-19

SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In High and Mighty, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of Unsafe at Any Speed and Fast Food Nation, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.

Cadet Blues - Rob Krider 2014-11-01

"A hilarious and inspiring story of academy survival." The California Highway Patrol Academy is by far one of the toughest law enforcement training facilities in the world. Completing the rigorous six month curriculum is not an easy task and many people fail to graduate. Cadet Blues is the story of one cadet who is desperately trying to survive the experience so he can earn the right to wear the seven point badge and call himself an officer."--Page [four] of cover.

Blueprint for Black Power - Amos N. Wilson 1998

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess

the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

A Study Of Performance Measurement In The Outsourcing

Decision - Ronan McIvor 2009-05-28

Outsourcing is a key issue for many organisations having moved from the contracting out of peripheral activities such as cleaning to more critical areas such as design and marketing. This report is for managers and people in finance and accounting functions and takes a practical approach in developing a framework and then applying this framework in an actual organisation which makes it easier for practitioners to understand. • This report provides a framework which incorporates both qualitative and quantitative performance measures that can be used in the outsourcing process • This research is of value to commercial and public sector organisations as well as academics as it provides insights for organisations considering outsourcing that will enable them to assess service levels throughout the contract

Electronic Transmission Controls - Ronald K. Jurgen 2000

The evolution of the automotive transmission has changed rapidly in the last decade, partly due to the advantages of highly sophisticated electronic controls. This evolution has resulted in modern automatic transmissions that offer more control, stability, and convenience to the

driver. Electronic Transmission Controls contains 68 technical papers from SAE and other international organizations written since 1995 on this rapidly growing area of automotive electronics. This book breaks down the topic into two sections. The section on Stepped Transmissions covers recent developments in regular and 4-wheel drive transmissions from major auto manufacturers, including Daimler Chrysler, General Motors, Toyota, Honda, and Ford. Technology covered in this section includes: smooth shift control automatic transmission efficiency mechatronic systems fuel saving technologies shift control using information from vehicle navigation systems fuzzy logic control. The section on Continuously Variable Transmissions presents papers that demonstrate that CVTs offer better efficiency than conventional transmissions. Technologies covered in this section include: powertrain control fuel consumption improvement development of a 2-way clutch system internal combustion engines with CVTs in passenger cars control and shift strategies CVT application to hybrid powertrains. The book concludes with a chapter on the future of electronic transmissions in automobiles.
